Optional Equipment for the Landmark® Digital Key System helps it offer even more big business features at a small business price.

DKS 616 Expansion Card

Inserted into the DKS 308 KSU, this expansion card adds capacity for three additional lines and eight additional stations, increasing total capacity to six lines and sixteen stations.

DKS 55 Special Option Board

The Special Option Board provides a number of useful features: background music, music-on-hold, remote programming, data communication through a modem, and connections for an external bell/ringer and external paging amplifier.
